

Job Create Screen

owner · admin

sub-view · admin-finance · mounted: false · NOT MOUNTED · new · Admin close-out

Admin form to create a new job: text fields for address, description and scheduled start, with "Cancel" and "Create job" buttons. Shows a sign-in empty state if there is no session.

Lets an owner or admin manually enter a new job (address required) and save it through the job repository.

How to identify when editing

file: `modules/admin-finance/src/screens/JobCreateScreen.tsx`
route: none
key: `af-JobCreateScreen`
anchor: `#screen-af-JobCreateScreen`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Cancel

Claims

R1 · unmounted: Screen "Job Create Screen" is not mounted in the app.
af-JobCreateScreen · modules/admin-finance/src/screens/JobCreateScreen.tsx · mounted=false

M6: Unmounted: no route or inbound nav found. No customer, service or area pickers (left null). Navigation is only via onCreated/onCancel callbacks, so the parent must wire them.
af-JobCreateScreen · modules/admin-finance/src/screens/JobCreateScreen.tsx

New Lead

owner admin

sub-view admin-finance mounted: true new Admin close-out

Owner/admin form titled New Lead: text fields for name, phone, email, service, preferred date (YYYY-MM-DD), time, address, project details; buttons Cancel and Create lead. Shows sign-in prompt if no session.

Lets an admin manually enter a new lead into the intake pipeline via the lead repository.

How to identify when editing

file: `modules/admin-finance/src/screens/LeadCreateScreen.tsx`
route: none
key: `af-leadCreate`
anchor: `#screen-af-leadCreate`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Cancel

Claims
M20: No navigation of its own; relies on onCreated/onCancel callbacks. Source, payer and attach-timing hold defaults in state but have no visible pickers. Name is the only required field.
af-leadCreate · modules/admin-finance/src/screens/LeadCreateScreen.tsx

Edit Lead

owner · admin

sub-view · admin-finance · mounted: true · new · Admin close-out

Edit Lead form: text fields (name, phone, email, service, preferred date/time, address, project details) plus Source, Payer and Attach-timing pickers. Buttons: Back, Save, Create job. Shows a readiness hint and errors.

Lets owners/admins correct a lead's details and check readiness before saving or converting it into a job.

How to identify when editing

file: `modules/admin-finance/src/screens/LeadEditScreen.tsx`
route: none
key: `af-leadEdit`
anchor: `#screen-af-leadEdit`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Back, Save, Create job

Claims
M21: No direct router navigation; Back, saved and Create-job transitions are delegated to parent callbacks (onBack, onSaved, onCreateJob). Not a dead end if the parent wires them.
af-leadEdit · modules/admin-finance/src/screens/LeadEditScreen.tsx

Leads

owner admin

sub-view admin-finance mounted: true new Admin close-out

Admin sees a "Leads" list of unconverted leads, newest first, including needs_info ones with badges. Taps a lead row to open it, or "New Lead" to create one. Has loading, error and empty states.

Lets owners/admins triage incoming leads before they are converted into jobs.

How to identify when editing

file: `modules/admin-finance/src/screens/LeadInboxScreen.tsx`
route: none
key: `af-leadInbox`
anchor: `#screen-af-leadInbox`
identifiers: testIDs none; accessibilityLabels none; buttonLabels New Lead

Claims
M22: Navigation is purely callback-driven (onSelectLead, onCreateLead); New Lead is disabled if the host does not pass onCreateLead. No filters or search. Nothing hardcoded in the screen.

Job Estimate

owner · admin

sub-view · admin-finance · mounted: true · qualified · Admin close-out

Admin edits a job's estimate: line items list with inline edit (Cancel/Remove), add via Manual or From Price Sheet (rate/area pick, Select), totals, copy share link, and Print / Save as PDF. Back to Job button.

Lets owners/admins build, price, share and print a job's estimate from line items, manually or from the price sheet.

How to identify when editing

file: `modules/admin-finance/src/screens/JobEstimateScreen.tsx`
route: none
key: `af-jobEstimate`
anchor: `#screen-af-jobEstimate`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Cancel, Remove, Manual, From Price Sheet, Print / Save as PDF

Claims
M18: Stage is inferred (estimate precedes scheduling); no direct nav except onBack; approveEstimate is imported, but its button was not checked.

Close-Out Review

owner · admin

sub-view · admin-finance · mounted: true · completed · Admin close-out

Admin sees one job's close-out review: status, a blockers list, Contact button, photo grid with Add photo and Remove, a quality-notes field, and a primary Close out job button disabled while blockers remain.

Lets an owner/admin capture photos and quality notes and close out a finished job once no blockers remain.

How to identify when editing

file: `modules/admin-finance/src/screens/CloseOutReviewScreen.tsx`
route: none
key: `af-closeOutReview`
anchor: `#screen-af-closeOutReview`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Contact, Add photo, Close out job, Remove

Claims
M12: No internal navigation; all actions are callbacks (onContact, onAddPhoto, onRemovePhoto, onChangeNotes, onCloseOut) that the caller must wire. No persistence of its own.
af-closeOutReview · modules/admin-finance/src/screens/CloseOutReviewScreen.tsx

Earnings

owner · admin · tech

sub-view · field-tech · mounted: exported-unmounted · NOT MOUNTED · completed · Ancillary

Per-job earnings breakdown: pay period, derived hours, bonus, commissions, reimbursements, close-out state. A text field plus a dispute button files a note-only dispute without changing job status.

Lets a tech see what a job earned them (hours, bonus, commissions, reimbursements) and raise a note-only dispute.

How to identify when editing

file: `modules/field-tech/src/screens/Earnings.tsx`
route: none
key: `ft-Earnings`
anchor: `#screen-ft-Earnings`
identifiers: testIDs none; accessibilityLabels none; buttonLabels none

Claims

R4 · unmounted: Screen "Earnings" is exported but never mounted in the app.
ft-Earnings · modules/field-tech/src/screens/Earnings.tsx · mounted=exported-unmounted

M42: Exported but unmounted: no route or inbound navigation. Takes job, period, bonusRule, etc. as props with no loader. No outbound navigation; dispute is the only action.

Callback tasks

owner · admin · sales

sub-view · sales-marketing · mounted: true · completed · Ancillary

Sales sees a list of completed jobs awaiting a follow-up call, a "Show Test Jobs" toggle, and a "Mark Called Back" button per task that removes it from the list. Shows loading and error states.

Gives sales a post-completion callback queue so customers of finished jobs get a follow-up call, tracked by a called-back timestamp.

How to identify when editing

file: `modules/sales-marketing/src/screens/CallbackTasks.tsx`
route: none
key: `sm-CallbackTasks`

Review Library

owner · admin · sales

sub-view · sales-marketing · mounted: true · completed · Ancillary

Sales sees published reviews with star rating, author, body, job id. Filters: Minimum rating chips (0-5), Service and Community id text boxes. Up/down arrows reorder rows; a curate button toggles curation.

Lets sales browse, filter, reorder and curate already-published customer reviews for marketing use.

How to identify when editing

file: `modules/sales-marketing/src/screens/ReviewLibrary.tsx`
route: none
key: `sm-ReviewLibrary`
anchor: `#screen-sm-ReviewLibrary`

Review

owner · admin

sub-view · admin-finance · mounted: true · paid · Admin close-out

Read-only reconciliation list for owner/admin. A "Needs attention" section shows pending or failed payments. A "Manually confirmed" section groups manual_confirmed payments by the tech who confirmed them. It has no buttons or pickers.

Lets admins spot payments that are stuck or failed and audit payments that techs confirmed manually, before closing out jobs.

How to identify when editing

file: `modules/payment-review/src/screens/ReconciliationView.tsx`
route: none
key: `af-paymentReview`
anchor: `#screen-af-paymentReview`

Payments

owner · admin

sub-view · admin-finance · mounted: true · paid · Admin close-out

Admin Payments tab: one scrollable page stacking the Payments list, Reimbursement Queue and Payout Batches sections; selecting a payout batch shows its detail with a back handler. Can auto-scroll to Payout Batches.

Merges payments, reimbursements and payout batches into one admin-finance tab so finance staff avoid separate tab navigation.

How to identify when editing

file: `modules/admin-finance/src/screens/PaymentsHubScreen.tsx`
route: none
key: `af-payments`

Payout Batches

owner · admin

drill-in · admin-finance · mounted: true · paid · Admin close-out

Admin lists payout batch records with their frozen lines and amounts; tap a batch to select it, and use Approve or Mark Paid buttons per batch. Shows loading/error/empty states and a banner that no payout is executed here.

Lets owners/admins review frozen payout batches and record approval and paid status, without the app executing any payout.

How to identify when editing

file: `modules/admin-finance/src/screens/PayoutBatchScreen.tsx`
route: none
key: `af-payments-PayoutBatchScreen`
anchor: `#screen-af-payments-PayoutBatchScreen`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Approve, Mark Paid

Claims
M27: No router navigation; onSelectBatch is an optional prop callback with no detail screen wired in the source. Batches are only displayed, never created here (persist happens elsewhere).

Root Layout

owner · admin · tech · sales

route · no module · mounted: true · none · Greeting

Invisible root Stack plus AuthGate. Shows loading, error or no-profile overlays with "Sign out" and "Sign in as someone else" buttons. Redirects signed-out users to sign-in and sends signed-in users to their role landing.

Wraps every screen in the app, enforces authentication and role-based landing, and handles the no-profile dead-end state.

How to identify when editing

file: `apps/mobile/app/_layout.tsx`

Sign In

owner · admin · tech · sales

route · no module · mounted: true · none · Greeting

Sign In form: Email and Password fields (with show/hide toggle), a "Sign in" button ("Signing in..." while busy), an inline "Sign-in failed" error, and a "Create an account" button.

Authenticates users by email and password so they can enter the app; on success the session listener swaps the route.

How to identify when editing

file: `apps/mobile/app/sign-in.tsx`
route: `/sign-in`
key: `sign-in`
anchor: `#screen-sign-in`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Create an account

Claims
M61: No forgot-password or reset link; the only navigation is to sign-up.

Sign Up

owner · admin · tech · sales

route · no module · mounted: true · none · Ancillary

Sign Up screen: notice that an admin invitation is required, Email and Password fields with Show/Hide toggle, a "Sign up" button (shows "Signing up..."), and a "Sign-up failed" error card on failure.

Lets an invited user create their account with the exact email their admin invited, before entering the app.

How to identify when editing

file: `apps/mobile/app/sign-up.tsx`
route: `/sign-up`
key: `sign-up`
anchor: `#screen-sign-up`

sweep-modules-admin-finance-src-screens-accordioneditrow-tsx

all

sub-view | no module | mounted: unknown | none | Ancillary

Reusable collapsible row in admin-finance: tap header (title/subtitle/tag) to expand edit fields, then Delete (two-tap "Confirm delete", optional), Cancel, or Save. Shows inline error text.

Shared inline-edit accordion component so admin finance lists can edit or delete rows in place with save/cancel/delete handling.

How to identify when editing

New Price Sheet

owner admin

sub-view admin-finance mounted: true none Ancillary

Admin form titled New Price Sheet: enter a numeric version number, then tap "Create price sheet" (shows "Creating..."), or "Cancel". Shows an error message on failure and a sign-in prompt if no session.

Lets owners/admins create a new draft price sheet version for their organization via the price sheet repository.

How to identify when editing

file: `modules/admin-finance/src/screens/PriceSheetCreateScreen.tsx`
route: none
key: `af-priceSheetCreate`
anchor: `#screen-af-priceSheetCreate`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Cancel

Claims
M30: Only a version field; no rates or task prices entered here. Navigation is delegated to onCreated/onCancel callbacks, so the screen itself has no direct nav targets.

Price Sheet Editor

owner · admin

sub-view · admin-finance · mounted: true · none · Ancillary

Admin edits one price sheet: help panel, Publish button for drafts, standard duration (Save Standard Duration), area price adjustments with +/- sign and Save, service tasks with Active toggle and + Add Task, and rates with Save Rate.

Lets owners/admins configure and publish the organization's price sheet (duration, area adjustments, tasks, rates) that drives job estimates.

How to identify when editing

file: `modules/admin-finance/src/screens/PriceSheetEditorScreen.tsx`
route: none
key: `af-priceSheetEditor`
anchor: `#screen-af-priceSheetEditor`

Reports

owner · admin

sub-view · admin-finance · mounted: true · none · Admin close-out

Read-only Reports screen for owner/admin: jobs grouped by status, slot hit-rate (Hit/Miss/Unknown, Hit Rate %), and commission totals (Known/Unknown). Rows drill into job lists; "< Back" button returns.

Gives admins read-only reporting summaries over jobs and commissions with honest unknown counts, drillable to job lists.

How to identify when editing

file: `modules/admin-finance/src/screens/ReportsScreen.tsx`
route: `none`
key: `af-reports`
anchor: `#screen-af-reports`
identifiers: testIDs none; accessibilityLabels none; buttonLabels < Back

Claims
M34: Takes plain jobs/commissions props, no data repo. Job-row selection (onSelectJob) relies on a parent wiring ReportsJobDetailScreen. Drill rows have no navigation of their own.
af-reports · modules/admin-finance/src/screens/ReportsScreen.tsx

Time Off

owner · admin

sub-view · admin-finance · mounted: true · none · Ancillary

Admin sees time-off requests: a pending queue and an Upcoming Blackouts list. An "Add Blackout" button opens the blackout editor; each row has a "Cancel" button. Pending requests are decided automatically.

Lets owners/admins review technician time-off requests and manage approved blackouts, which feed scheduling.

How to identify when editing

file: `modules/admin-finance/src/screens/TimeOffQueueScreen.tsx`
route: none
key: `af-timeOffQueue`
anchor: `#screen-af-timeOffQueue`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Add Blackout, Cancel

Claims
M35: No approve/deny actions: pending requests are decided by a database trigger. Add Blackout navigates via the onAddBlackout callback, which the host must wire to BlackoutEditorScreen.

Overview

owner · admin · tech

sub-view · field-tech · mounted: true · none · Ancillary

Read-only tech dashboard of count cards (Jobs, Time off, Reimbursements, Notes, Photos, Checklist). Tapping a count drills into a job list ('‹ Back to overview'); job rows open the job; time-off counts open Time Off.

Give a field tech a quick at-a-glance summary of their assigned jobs, time off, reimbursements, notes, photos and checklists.

How to identify when editing

file: `modules/field-tech/src/screens/Overview.tsx`
route: none
key: `ft-Overview`
anchor: `#screen-ft-Overview`
identifiers: testIDs none; accessibilityLabels none; buttonLabels ‹ Back to overview

Claims
M45: Reimbursement and time-off cards have no direct link to their own screens beyond callbacks; navigation relies on optional onOpenJob/onOpenTimeOff props, which do nothing if the parent omits them.
