

#0001 root-layout

Root Layout

owner · admin · tech · sales

route · no module · mounted: true · none · Greeting

Wraps every screen in the app, enforces authentication and role-based landing, and handles the no-profile dead-end state.

Invisible root Stack plus AuthGate. Shows loading, error or no-profile overlays with "Sign out" and "Sign in as someone else" buttons. Redirects signed-out users to sign-in and sends signed-in users to their role landing.

How to identify when editing

file: `apps/mobile/app/_layout.tsx`
route: none
key: `root-layout`
anchor: `#screen-root-layout`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Sign out, Switch user

Claims
R87 · not-navigable: Screen "Root Layout" had no inbound navigation edge found in the capture run (no in-app link recorded).
root-layout · apps/mobile/app/_layout.tsx · 0 resolved inbound edges

#0002 index

index

owner · admin · tech · sales

route · no module · mounted: true · none · Greeting

Entry point that redirects each signed-in role (owner, admin, tech, sales) to its landing screen.

Root route "/" renders only RoleLandingRedirect; the user sees no UI of their own, and is sent to a role-specific landing screen. No buttons or pickers.

How to identify when editing

file: `apps/mobile/app/index.tsx`
route: `/`
key: `index`
anchor: `#screen-index`
identifiers: testIDs none; accessibilityLabels none; buttonLabels none

Claims

R48 · dead-end: Screen "index" had no outgoing navigation edge found in the capture run.
index · apps/mobile/app/index.tsx · 0 resolved outgoing edges

M47: Redirect destinations live in RoleLandingRedirect, which was not read, so they are not listed. The screen itself has no UI.
index · apps/mobile/app/index.tsx

#0003 sign-in

Sign In

owner admin tech sales

route no module mounted: true none Greeting

Authenticates users by email and password so they can enter the app; on success the session listener swaps the route.

Sign In form: Email and Password fields (with show/hide toggle), a "Sign in" button ("Signing in..." while busy), an inline "Sign-in failed" error, and a "Create an account" button.

How to identify when editing

file: `apps/mobile/app/sign-in.tsx`
route: `/sign-in`
key: `sign-in`
anchor: `#screen-sign-in`
identifiers: testIDs none; accessibilityLabels Forgot password? Reset your password, PIN; buttonLabels Sign in offline, Create an account

Claims
M59: No forgot-password or reset link; the only navigation is to sign-up.

#0004 sign-up

Sign Up

owner · admin · tech · sales

route · no module · mounted: true · none · Ancillary

Lets an invited user create their account with the exact email their admin invited, before entering the app.

Sign Up screen: notice that an admin invitation is required, Email and Password fields with Show/Hide toggle, a "Sign up" button (shows "Signing up..."), and a "Sign-up failed" error card on failure.

How to identify when editing

file: `apps/mobile/app/sign-up.tsx`
route: `/sign-up`
key: `sign-up`
anchor: `#screen-sign-up`
identifiers: testIDs none; accessibilityLabels none; buttonLabels none

Claims
M60: No link back to sign-in and no forgot-password or email-confirmation handling. Navigation relies on the session listener swapping routes after success.

#0005 module-host

Module Host

owner · admin · tech · sales

route · no module · mounted: true · none · Ancillary

Single static route that hosts any module's component, injecting session and ports and gating by org and role.

Invisible host: resolves /m/[moduleId] via enabled-modules registry and renders that module's screen (admin-finance, field-tech, sales-marketing). Shows loading or empty state if disabled/not permitted. No own buttons.

How to identify when editing

file: `apps/mobile/app/m/[moduleId].tsx`
route: `/m/[moduleId]`
key: `module-host`
anchor: `#screen-module-host`
identifiers: testIDs none; accessibilityLabels none; buttonLabels none

Claims

#0006 field-tech

Field Tech

owner · admin · tech

module-root · field-tech · mounted: true · none · DayList

Hosts the technician's home area and wires per-job actions (on-my-way, start, complete) through status transitions.

Field Tech module root with a state-driven switcher: Overview, Jobs (DayList), Time Off, Prems, Reviews; selecting a job opens FieldJobDetail. Menu has Logins, Settings, Profile. Alerts on invalid Start/Stop actions.

How to identify when editing

file: `modules/field-tech/src/index.ts`
route: `/m/field-tech`
key: `field-tech`
anchor: `#screen-field-tech`
identifiers: testIDs none; accessibilityLabels none; buttonLabels none

Claims
M35: Nothing notable; reviews and prems sub-views exist in source though the row's navTargets omit them.

Help

Field Tech Overview (inferred link)

A summary of your work in tiles: Jobs, Prems Claimed, Time Off, Reimbursements, Notes, Photos and Checklist. Tap a count such as Assigned or Open to see the matching list.

#0007 tabs-layout

Tabs

owner admin tech

route no module mounted: true none DayList

Provides the tab navigation container that hosts the Calendar and Jobs screens for owner, admin and tech roles.

Bottom tab bar shell with two tabs, Calendar (with header) and Jobs (header hidden). Active tint is primary color; off-white scene background. No buttons or pickers of its own.

How to identify when editing

file: `apps/mobile/app/(tabs)/_layout.tsx`
route: `/(tabs)`
key: `tabs-layout`
anchor: `#screen-tabs-layout`
identifiers: testIDs calendar-help; accessibilityLabels none;
buttonLabels none

Claims

R64 · dead-end: Screen "Tabs" had no outgoing navigation edge found in the capture run.
tabs-layout · apps/mobile/app/(tabs)/_layout.tsx · 0 resolved outgoing edges

M71: No role-based tab filtering or other tabs (settings, profile) declared; all three roles see the same two tabs.

Help

Calendar (inferred link)

See scheduled work by day or week. Use the toggles to show or hide "Jobs", "Time Off", and "Show Test Jobs". Tap "Blackouts" to see every scheduled blackout and tick or untick each tech (all on by default), or "Add Blackout" to block out dates for a tech.

#0009 jobs

Jobs

owner admin tech

route | no module | mounted: true | none | Job Detail

Host screen that loads the tech's assigned job and passes it to JobDetail, with an entry point to create a new job.

Jobs tab: shows a "Show Test Jobs" toggle and a "New job" button. A tech sees their one assigned job rendered by JobDetail; everyone else sees an empty "No job selected" placeholder.

How to identify when editing

file: `apps/mobile/app/(tabs)/jobs.tsx`
route: `/jobs`
key: `jobs`
anchor: `#screen-jobs`
identifiers: testIDs none; accessibilityLabels none; buttonLabels New job

Claims
M51: No job list: the empty state says it "lands in a later slice". Owners and admins never get a job. Techs get only the first assigned job (limit 1), with no day list or switching.
jobs · apps/mobile/app/(tabs)/jobs.tsx

#0010 admin-finance

Admin & Finance

owner · admin

module-root · admin-finance · mounted: true · none · Admin close-out

Central admin and finance module root for owners and admins to triage leads, assign jobs, close out work, and manage payments, pricing and time off.

Owner/admin hub with an overview of cards and a sub-view switcher: lead inbox/qualify, assignment board, close-out queue, payments, price sheets, time-off/blackouts, planning, reports, employees. Buttons: Add Job, Plan, Add Blackout.

How to identify when editing

file: `modules/admin-finance/src/screens/AdminFinanceRoot.tsx`
route: `/m/admin-finance`
key: `admin-finance`
anchor: `#screen-admin-finance`
identifiers: testIDs jobs-closed-btn, jobs-archived-btn; accessibilityLabels Prem done, Estimate approved; buttonLabels Closed, Archived, Add Job, Archive, Detail

Claims
M4: Source has a TODO(forward contract) near line 708: no per-actor CompensationPolicy repository/field, so close-out compensation is not fully wired. Screen is read-only for job stage.

Help

Overview (inferred link)

Your starting point for Admin & Finance. Each card (Leads, Jobs, Assignments, Price Sheets, Payments & Payouts, Review, Payroll, Calendar, Reports, Employees) shows a quick count; tap one to open it.

#0011 af-calendar

Calendar

owner admin

sub-view admin-finance mounted: true scheduled Ancillary

Lets admins see scheduled jobs and tech time-off together by week or month, filter by tech, and add blackout dates or assign unassigned jobs.

Admin calendar of jobs and time-off in Week or Month list view, with prev/next/Today header, a "Technicians" Select (All Techs) filter and an "Add Blackout" button. Tapping a job opens it, assigns it, or goes to Assignments.

How to identify when editing

file: `modules/admin-finance/src/screens/AdminFinanceRoot.tsx`
route: none
key: `af-calendar`
anchor: `#screen-af-calendar`
identifiers: testIDs jobs-closed-btn, jobs-archived-btn; accessibilityLabels Prem done, Estimate approved; buttonLabels Closed, Archived, Add Job, Archive, Detail

Claims
M8: No notable gaps; unassigned job taps with no tech selected fall back to the Assignments board rather than assigning directly.

Create the Lead

Every job starts as a lead. Open the lead from the Leads list, choose its Source, Payer, Attach timing and Service Area, then qualify it into a real job.

#0015 af-qualify

Qualify Lead

owner · admin

sub-view · admin-finance · mounted: true · qualified · Admin close-out

Lets owner/admin confirm a lead's source, payer and attach-timing axes so the lead can be qualified into a job.

Staff see a lead's details (tap-to-call phone) and pick Source, Payer, Attach timing and optional Service Area via AxisPicker. Missing fields are listed. Qualify is disabled until ready; Cancel exits.

How to identify when editing

file: `modules/admin-finance/src/screens/QualifyScreen.tsx`
route: none
key: `af-qualify`
anchor: `#screen-af-qualify`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Cancel, Qualify

Claims
M30: No direct navigation; it is props-in/callbacks-out (onSubmit/onCancel), so routing and the qualify flow live in the caller. Only a phone link opens externally.

Help

Create the Lead

Every job starts as a lead. Open the lead from the Leads list, choose its Source, Payer, Attach timing and Service Area, then qualify it into a real job.

#0016 af-assignmentBoard

Assignments

owner admin

sub-view admin-finance mounted: true scheduled Admin close-out

Lets owners/admins assign qualified or scheduled jobs to active techs, with warn-only conflict warnings before confirming.

Admin board of qualified/scheduled jobs: unassigned pool plus tech columns. Pick a visit kind (Service/Prem), choose a tech via Select, tap Confirm; a WarningSheet shows warn-only warnings. Category filter chips. Action buttons are G1 sand buttons. A Soonest/Newest sort segment row (default Soonest) orders the pool: unassigned jobs first, assigned jobs dimmed and last. Tap a job opens #0041.

Assignments

Match qualified jobs to techs. Choose "Service" or "Prem" for the visit, pick the tech, then tap "Confirm".

#0017 af-closeOutQueue

Close-Outs

owner admin

sub-view admin-finance mounted: true completed Admin close-out

Lets owners/admins see which jobs await close-out and what blocks each one.

Admin sees a read-only "Close-Out Queue" of jobs grouped into Unassigned, In Progress, Completed, each card showing customer, last-worked tech and blocker reasons. Tapping a card fires onSelectJob. Empty states shown.

How to identify when editing

file: `modules/admin-finance/src/screens/CloseOutQueueScreen.tsx`
route: none
key: `af-closeOutQueue`
anchor: `#screen-af-closeOutQueue`
identifiers: testIDs none; accessibilityLabels none; buttonLabels none

Claims
M9: Read-only: no close action (deferred to P3h.3b per source comment). Navigation depends on caller-supplied onSelectJob; the screen itself has no routes.

Help

Close Out the Job (inferred link)

The job is paid. An owner or admin reviews the final numbers and closes it out so it moves into history. The job still closes if the price sheet has no commission rate. Any commission lines show in the Payouts tab next to that tech's pay and go out with the next payroll run once the job is closed out. On a closed job, the Close-Out page shows what was paid out, read-only: each technician's flat rate, Prem bonus or commission line, and whether it is waiting for the next payroll run or already included. Hourly technicians do not appear because they are paid from their timesheets. The "Close out job" and "Add photo" buttons are hidden once the job is closed.

#0019 af-priceSheetList

Price Sheets

owner admin

sub-view admin-finance mounted: true none Ancillary

Lets owners and admins browse every price sheet for the organization by status and start a new one or open an existing one.

Admins see the org's price sheets grouped Published, Draft, Archived, each row with its status and publish date. A "Create price sheet" button shows at the top and in the empty state. Tapping a row selects it.

How to identify when editing

file: `modules/admin-finance/src/screens/PriceSheetListScreen.tsx`
route: none
key: `af-priceSheetList`
anchor: `#screen-af-priceSheetList`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Create price sheet

Claims
M29: No navigation wired in this file: onSelectSheet and onCreateNew are optional callbacks, so row taps and Create do nothing unless the parent passes them. No inbound route; it is a sub-view.

Help

Price Sheets

Rates and area adjustments, grouped as Drafts, Published and Archived. Tap "Create price sheet" to start a new one.

How price sheets work

- A price sheet is one versioned set of task prices, trip durations and area adjustments.
- Only one version is Published at a time; techs and estimates always use that one.
- Drafts are private — nothing here changes what techs see until you tap Publish.
- Publish makes this version live and archives the previous one; published versions never change again.
- Price Area Adjustments raise or lower every price on this sheet for the selected service areas, by percent or a flat amount.

#0021 af-payments-ReimbursementQueueScreen

Reimbursements

owner admin

drill-in admin-finance mounted: true none Ancillary

Lets owners/admins review pending expense reimbursements and approve or reject them, with a required reason for rejection.

Admin sees "Reimbursements" with a "Pending Review" list showing amount and description per row. Each row has Approve, Reject (opens inline reason input), and Confirm Reject buttons; per-row errors show inline.

How to identify when editing

file: `modules/admin-finance/src/screens/ReimbursementQueueScreen.tsx`
route: `none`
key: `af-payments-ReimbursementQueueScreen`

#0034 sm-Composer

Compose Post

owner admin sales

sub-view sales-marketing mounted: true none Ancillary

Lets sales/marketing staff assemble, approve, and export or post a social media draft from a pitch angle without auto-posting or fabricating claims.

User sees a suggested caption from the chosen pitch angle, picks a platform, edits the caption, toggles approved assets, taps "Approve draft", then manual export or direct post (if Meta enabled), then "Done".

How to identify when editing

file: `modules/sales-marketing/src/screens/Composer.tsx`
route: none

Claims

R55 · dead-end: Screen "Compose Post" had no outgoing navigation edge found in the capture run.
sm-Composer · modules/sales-marketing/src/screens/Composer.tsx · 0 resolved outgoing edges

R89 · not-navigable: Screen "Compose Post" had no inbound navigation edge found in the capture run (no in-app link recorded).
sm-Composer · modules/sales-marketing/src/screens/Composer.tsx · 0 resolved inbound edges

M62: No route of its own (sub-view only); Done just calls the onDone prop. Direct post is unavailable unless meta-publish is enabled, in which case the UI says so.
sm-Composer · modules/sales-marketing/src/screens/Composer.tsx

#0034 Compose Post owner admin sales sub-view continued - page 2 of 3

Help

Compose Post

Pick a Platform (Facebook or Instagram), write the caption and add approved assets, then tap "Approve draft". After that use "Export images, copy caption, share" or direct post.

#0035 sm-PitchPicker

Pitch Picker

owner admin sales

sub-view sales-marketing mounted: true none Ancillary

Lets a sales rep choose the pitch angle for a marketing post before composing it.

Sales reps see a "Pitch Picker" title and four tappable cards (Service line, Community, Seasonal, Before / after), each with a description. Tapping one hands the angle to the Composer.

How to identify when editing

file: `modules/sales-marketing/src/screens/PitchPicker.tsx`
route: none
key: `sm-PitchPicker`
anchor: `#screen-sm-PitchPicker`
identifiers: testIDs none; accessibilityLabels none; buttonLabels none

Claims

R92 · not-navigable: Screen "Pitch Picker" had no inbound navigation edge found in the capture run (no in-app link recorded).
sm-PitchPicker · modules/sales-marketing/src/screens/PitchPicker.tsx · 0 resolved inbound edges

M64: No inbound route; navigation is via the onNavigateToComposer prop. The source says SalesMarketingRoot threads it "once it threads this prop through", so the wiring may be incomplete.
sm-PitchPicker · modules/sales-marketing/src/screens/PitchPicker.tsx

Pick a Pitch Angle

Choose how to build a post: "Service line", "Community", "Seasonal" or "Before / after". Tapping one opens the Composer with that angle.

#0036 `sm-Reporting`

Reporting

owner · admin · sales

sub-view · sales-marketing · mounted: true · none · Ancillary

Gives owner, admin and sales users a non-financial overview of marketing activity and lead sources for the sales-marketing module.

Read-only "Marketing Reporting" page: paid-ads out-of-scope notice, then counts of posts by platform and month, assets used, reviews by platform, jobs by source and by attach timing. No buttons or pickers.

How to identify when editing

file: `modules/sales-marketing/src/screens/Reporting.tsx`
route: `none`
key: `sm-Reporting`
anchor: `#screen-sm-Reporting`
identifiers: testIDs none; accessibilityLabels none; buttonLabels none

Claims

R93 · not-navigable: Screen "Reporting" had no inbound navigation edge found in the capture run (no in-app link recorded).
sm-Reporting · modules/sales-marketing/src/screens/Reporting.tsx · 0 resolved inbound edges

M65: Display only: no period picker, filters, drill-down or export. Reviews are not broken out by service or community because the ports lack those fields. No navigation out of the screen.
sm-Reporting · modules/sales-marketing/src/screens/Reporting.tsx

Overview (inferred link)

A quick snapshot of open callback tasks, Recent reviews and Reporting totals. Tap "Recent reviews" to jump to the Review Library.

#0040 job-region-assign

Assign

owner · admin · tech

region · no module · mounted: true · assigned · Job Detail

Lets an admin assign, reassign or unassign the technician (and Prem investigator) for a job, advancing it toward assigned status.

Admin-only Assign tab on the Job page: shows "Assign Technician" with eligible techs to pick, plus unassign; busy/error shown; "Reassign job?" WarningSheet (Cancel/confirm) when moving a Prem tech.

How to identify when editing

file: `apps/mobile/app/job/[jobId].tsx`
route: none
key: `job-region-assign`
anchor: `#screen-job-region-assign`
identifiers: testIDs job-progress-bar, estimate-tab-bar; accessibilityLabels Prem Needed; buttonLabels Back, Cancel, Reset time

Claims
M48: Nothing notable; region renders only when isAdmin, so owner/tech roles listed in the row never see it. Row buttonLabels only lists Cancel.

Callback Tasks

Lists customers waiting for a call back. Tap "Mark Called Back" once you have called. Turn on "Show Test Jobs" to include test jobs.

#0050 af-payments-PayoutBatchDetailScreen

Payout Batch Detail

owner admin

drill-in admin-finance mounted: true paid Admin close-out

Lets owners and admins inspect a frozen payout batch's per-employee lines and total after a row tap in the batch list.

Read-only payout batch drilldown: shows the period, status, each employee's frozen line (hours, commission, bonus, reimbursement, total, frozen date), the batch total, and a "Records only" note. Only button: Back.

How to identify when editing

file: `modules/admin-finance/src/screens/PayoutBatchDetailScreen.tsx`
route: `none`
key: `af-payments-PayoutBatchDetailScreen`
anchor: `#screen-af-payments-PayoutBatchDetailScreen`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Back

Claims
M23: No actions beyond Back: no export, no mark-paid, no per-line drilldown. Lines show raw userId rather than employee names. Not routed; reached only via parent AdminFinanceRoot.

#0054 ft-Overview

Overview

owner · admin · tech

sub-view · field-tech · mounted: true · none · Ancillary

Give a field tech a quick at-a-glance summary of their assigned jobs, time off, reimbursements, notes, photos and checklists.

Read-only tech dashboard of count cards (Jobs, Time off, Reimbursements, Notes, Photos, Checklist). Tapping a count drills into a job list ('‹ Back to overview'); job rows open the job; time-off counts open Time Off.

How to identify when editing

file: `modules/field-tech/src/screens/Overview.tsx`
route: none
key: `ft-Overview`
anchor: `#screen-ft-Overview`
identifiers: testIDs none; accessibilityLabels Open assigned jobs; buttonLabels ‹ Back to overview

Claims
M41: Reimbursement and time-off cards have no direct link to their own screens beyond callbacks; navigation relies on optional onOpenJob/onOpenTimeOff props, which do nothing if the parent omits them.

Time-off requests from your techs and the upcoming blackouts. Reach it from Calendar: tap "Blackouts" to show every blackout and tick or untick each tech (all on by default), or tap "Add Blackout" to block out dates for a tech.

#0057 af-jobEstimate

Job Estimate

owner admin

sub-view admin-finance mounted: true qualified

Admin close-out

Lets owners/admins build, price, share and print a job's estimate from line items, manually or from the price sheet.

Admin edits a job's estimate across 3 tabs. Tasks (default): opens with a Before-photo card (caption "Take a photo of the job Before proceeding", up to 6 photos saved as <job#>BEF-1..6.jpg, each with a note stored inside the JPEG), followed by a Tasks card (heading row: Tasks, Add Task button in the middle, Save to price sheet toggle at right; Type defaults to Labor; per-line Remove); line items with inline edit (Cancel/Remove), manual add, Build lines from tasks, auto-picked service area shown read-only, and Payment Outlay including applied contingencies. Contingencies: toggle rows with an Applies switch, edit/delete; applied rows add to the total. Fine Print: editable template, placeholder until text is supplied. Start Work and Photos stage presses and Arrive open this tab. Also copy share link, Print / Save as PDF, and Back to Job button.

How to identify when editing

file: `modules/admin-finance/src/screens/JobEstimateScreen.tsx`

Jobs

Every job on file for your organization. Tap a job to open its planning details and estimate.

#0058 job-region-schedule

Schedule

owner admin tech

region no module mounted: true scheduled Job Detail

Lets an admin schedule a job by picking a date and time on an inline calendar, see every other scheduled job and blackout around it, then save, reschedule or clear the job's schedule.

Schedule #0058 (after Calendar Redux): opens from the job header's schedule label or from Job menu > Schedule. An inline month calendar (Sun-Sat grid, previous/next month arrows) with hour, minute and AM/PM columns, like the browser's date-time popup. A bold heading above it shows the saved date and time (e.g. "Thursday, October 22, 2026 at 12:39 PM to 1:39 PM") or "Not scheduled". Save, Clear and Cancel sit at the top: Save is enabled only after a change, Clear empties the pending date/time, Cancel discards the pending change and shows the saved date/time again. Changing a saved date/time and pressing Save asks "Reschedule?" (Yes / No): Yes saves and adds a "Rescheduled" entry to the job's trail, No restores the saved date/time. Clearing a saved date/time and pressing Save asks "Remove from schedule?" (Yes / No). The calendar marks every scheduled job (dots) and every blackout (red day number and a red dot). Tapping a day makes it the pending date and lists that day's jobs and blackouts underneath; tapping a listed job or blackout opens a popup. A job shows name, address, phone and job description plus an "Open job" link (hidden for the job you are already on) that switches to that job; a blackout shows its time-off details; "Close" dismisses the popup. The job's Options menu has a "Blackout Dates?" toggle that shows or hides the red blackouts (on by default each time a job is opened). No longer on this screen: Prem Tech / Service Tech / Service Area at the top, the Technicians / Blackouts / Request time off bar (the Calendar tab keeps it), the From/To time popup, and "Cancel visit".

Help

Reschedule the Job (inferred link)

This job needs a new date. Pick a new date and time on the calendar, then tap "Save" and answer "Yes" to "Reschedule?". Days with other jobs or blackouts are marked, and tapping a day lists them.

#0060 af-employee-invitations

Pending Invitations

owner admin

sub-view admin-finance mounted: true none Ancillary

Lets owners and admins invite an employee by email, and review and revoke outstanding employee invitations.

Admins see a list of pending employee invitations for their organization. An email field and Send button at the top create a new pending invitation (role tech, no name); a blank, invalid or already-pending email shows an inline error. Each row has a Revoke button that removes it on success or shows an inline error. Has loading, empty and error states.

How to identify when editing

Employees

#0060 Pending Invitations owner admin sub-view

Your Employee Roster. Tap "Add Employee" to add someone, or "Pending Invitations" to see invites not yet accepted. Pay is set on an employee's Pay tab: "Base Pay" is one box that follows the Hourly/Flat picker. Employees also get a "Commission" switch with a percent box. Off means base pay only; on adds an extra commission payout on top of base pay, equal to that percent of the job's labor cost. Contractors do not get the switch.

#0061 job-region-evisit

Prelim (Prem)

owner · admin · tech

region · no module · mounted: true · scheduled · Job Detail

Lets an assigned investigator record preliminary site findings on a job before work, as one evolving record per job until submitted.

Tech fills a guided on-site investigation form: ingress, logistics, parking notes and a state assessment. Buttons: Back to Job, Save Draft, Submit (stamps submitted_at). Shows job header and submit time.

How to identify when editing

file: `modules/field-tech/src/screens/JobInvestigationScreen.tsx`
route: `/job/[jobId]`
key: `job-region-evisit`
anchor: `#screen-job-region-evisit`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Back to Job, Add photo, Save Draft, Submit, Delete

Claims
M49: No router navigation; only an onBack callback. Reached from the tech's job detail once an investigator assignment exists, and can be embedded there. No link onward after Submit.

Help

Test Jobs

Practice with fake jobs that do not affect real work. "Spawn Test Jobs" makes some, "Run Job Simulator" plays one through, and "Delete" or "Delete All" cleans up.

#0067 ft-Reviews

Reviews

owner admin tech

sub-view field-tech mounted: true none Ancillary

Stub destination so the field-tech AppChrome H menu Reviews item resolves to a real screen instead of a dead onPress.

Placeholder empty-state screen titled "Reviews" showing the message "Reviews are coming soon." No buttons or pickers; reached from the field-tech H menu.

How to identify when editing

file: `modules/field-tech/src/screens/Reviews.tsx`
route: none
key: `ft-Reviews`
anchor: `#screen-ft-Reviews`
identifiers: testIDs none; accessibilityLabels none; buttonLabels none

Claims
M45: Whole feature is unbuilt: a "coming soon" stub with no review data, no controls, and no navigation out (source comment: no Reviews feature exists yet in field-tech).
ft-Reviews · modules/field-tech/src/screens/Reviews.tsx

Help

Reviews

Reviews are coming soon. This view only shows a "Reviews are coming soon." message for now.

#0068 account

Account

owner admin tech sales

route no module mounted: true none Ancillary

Lets any signed-in user see their account and sign out or switch to another user.

Account page inside app chrome showing the signed-in organization and profile, with "Sign out" and "Sign in as someone else" buttons. Each asks for confirmation, then signs out and returns to /sign-in.

How to identify when editing

file: `apps/mobile/app/account.tsx`
route: `/account`
key: `account`
anchor: `#screen-account`
identifiers: testIDs none; accessibilityLabels none; buttonLabels Sign out, Switch user

Claims
M3: No profile editing, password change, or settings links; the two buttons do the same thing (sign out, go to /sign-in).

#0069 `ft-PremJobs`

Prems

owner · admin · tech

sub-view · field-tech · mounted: true · none · Ancillary

Lets techs see the queue of jobs flagged as needing a Prem, claim one, and jump to record its Prem report.

Prems list of jobs needing a Prem. Each card shows customer, address, service, "Needs Prem since" date. Button reads "Claim" (confirm Cancel/Yes) or "Record" if claimed by me, opening the job's Prem report panel. Pull to refresh.

How to identify when editing

file: `modules/field-tech/src/screens/PremJobs.tsx`
route: none
key: `ft-PremJobs`

Help

Prems

Lists jobs that need a Prem (premium visit). Tap Claim to take a job (confirm with Yes), then tap Record on a job you claimed to fill in its Prem report.

#0070 sweep-modules-admin-finance-src-screens-accordioneditrow-tsx

sweep-modules-admin-finance-src-screens-accordioneditrow-tsx

all

sub-view | no module | mounted: true | none | Ancillary

Shared inline-edit accordion component so admin finance lists can edit or delete rows in place with save/cancel/delete handling.

Reusable collapsible row in admin-finance: tap header (title/subtitle/tag) to expand edit fields, then Delete (two-tap "Confirm delete", optional), Cancel, or Save. Shows inline error text.

How to identify when editing

file: `modules/admin-finance/src/screens/AccordionEditRow.tsx`

Claims

#0099 `stuck-popup`

Stuck changes

owner · admin · tech · sales

dialog · no module · mounted: true · none · Ancillary

Warns the user that some offline changes are not sending and gives one-tap ways to retry or look closer, while other jobs keep syncing.

Popup titled "Changes are stuck" that opens over any screen when a queued change keeps failing to send. It lists the stuck changes with their error, and offers "Unstick and sync", "Sync now", "Sync issues" (opens #0098) and "Later".

How to identify when editing

file: `apps/mobile/src/components/StuckPopup.tsx`
route: `none`
key: `stuck-popup`
anchor: `#screen-stuck-popup`
identifiers: testIDs stuck-popup, stuck-popup-unstick, stuck-popup-sync-now, stuck-popup-sync-issues, stuck-popup-later;
accessibilityLabels Unstick and sync, Sync now, Sync issues, Later; buttonLabels Unstick and sync, Sync now, Sync issues, Later

Claims
M67: Offline/sync-only screen: it appears only when changes are stuck, so the online admin capture cannot show it. No screenshot in this inventory.
